Sprint 2

Krutik Tejalkumar Shah

Mark (LiangShu) Chen

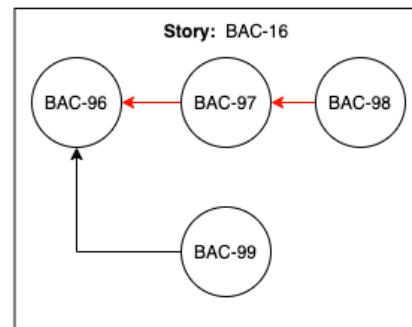

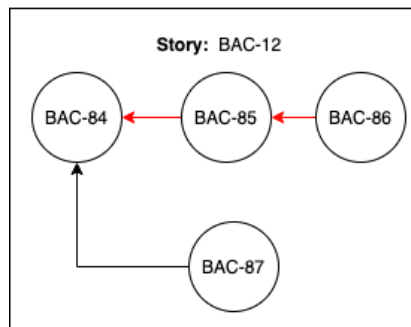

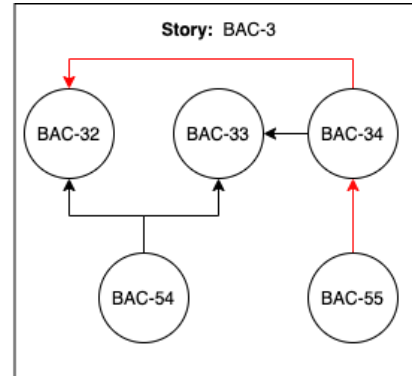

Steven Hans Linnantoro

Tanzim Ahmed

Tony Chen

Pasa Aslan

Payam Yektamaram

The red-coloured edges depict the critical path of the network diagram for each user story in our current sprint. Each story has a similar critical path, as each subtask has 3 main tasks consisting of a frontend, backend, and documentation task. Simply the frontend depends on the completion of the backend task and then the documentation tasks depend on the completion of the aforementioned tasks. We were proactive in our sprint and therefore we made sure to start the backend tasks as soon as possible and merged them into develop so the frontend developers could complete their tasks. However, to make sure the documentation tasks were not delayed the frontend developers worked on the tasks until they reached the point where they required the backend endpoint which in our current sprint blocked the frontend people for a very short time.
